Detailed Action

This action is in response to the RCE filed on 2/28/07.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 121-124 & 126-129 & 132-134 are, drawn to a computer program product for handling transaction information
- II. Claims 135-138 & 146 are, drawn to an apparatus that provides a transaction interface for storing and retrieving information.
- III. Claims 139-144 & 147 are drawn to a method for creating a transaction record.

Inventions I, II & III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the apparatus (system) in inventions I can be used in a materially different process than that recited in method claims of inventions II as explained below.

The apparatus recited in Invention II is materially different than the process recited in invention I for example, second subjective information parameter described in III is not included in II.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiners Note

Once the applicant has selected the claims based on this restriction for the examiner to review it is recommend that the applicant call the examiner to set-up a telephone conference. The examiner believes there are come clarity issues with the claims (112 issues) and speed up prosecution a interview to discuses the claim language is recommended to move these case forward to a potential allowance.
